Headquartered in Washington, DC, the GPO is responsible for the production and distribution of information products and services for all three branches of the Federal Government. Many of the Nation's most important information products, such as the *Congressional Record* and *Federal Register*, are produced at the GPO's main plant, a 1.5 million square-foot complex that is the largest information processing, printing, and distribution facility in the world. In addition to its own production facilities, the GPO maintains a pool of thousands of private sector vendors across the country to produce print and other information products for the Federal Government ranging from publications for the Defense Department to Supreme Court reports and tax and census forms. The GPO disseminates Federal information products through a sales program, distribution to a network of 1,200 Federal depository libraries nationwide, and online via **GPO Access** (www.gpoaccess.gov). This award-winning service features nearly a quarter of a million titles online, and is used by the public to retrieve more than 31 million documents every month.
